Education

University of Ottawa CGPA:9.12/10

Honours Bachelor's in Computer Science Sep. 2023 – Dec 2027

Experience

Database Developer Intern Sept 2026 – Present

Lockheed Martin Canada Ottawa, Ontario

- Current intern at Lockheed Martin Canada.

Cloud Systems Analyst Intern Jan 2026 – Aug 2026

Department of National Defense. Ottawa, Ontario

- Assisted with the installation of Windchill (PLM Software) on Azure, including configuring the Oracle Database, and integrating Microsoft Entra ID for LDAP authentication.
- Assisted in migrating a SharePoint 2019 site to SharePoint Online, successfully transferring **7000+ files,** while maintaining data integrity and minimizing downtime.
- Engineered a **Python automation script**, to parse and analyze user login data from Excel, generating a targeted list of accounts deemed inactive and reducing the time spent removing them by **75%.**
- Designed and deployed an end-to-end employee onboarding workflow in **Power Automate,** automating access provisioning and getting new hires onboarded **50%** faster.

Software Engineer Intern May 2025 – Dec 2025

National Research Council of Canada Ottawa, Ontario

- Developed a full-stack web application using modern technologies: **React, Typescript, Tailwind** (frontend), and **Node, MSSQL, Microsoft Graph** (backend), delivering a production ready tool by the end of term.
- Architected and deployed a cloud hosted **Azure SQL** database from an ERD diagram, ensuring secure and scalable data storage.
- Implemented **Microsoft Entra SSO** authentication with role-based access control, enhancing security and ensuring compliance.

Projects

Malicious Link Checker **|React, Typescript, Scikit-Learn, Flask, Pandas, AWS Amplify, Render**

- Developed a full-stack web application using **React** and **Flask,** that uses **Machine Learning** to classify URL's as malicious or benign.
- Trained a **Decision Tree** classifier with **Scikit-Learn,** achieving an accuracy rating of **96%** on a dataset of **130,000+** URLs.
- Built a data pipeline with **Pandas** to extract **22 URL-based features** transforming raw URL data into structured data for model training.
- Deployed the frontend on **AWS Amplify**, and the backend on **Render**, implementing CI/CD pipelines for automated deployments.

Technical Skills

Languages: JavaScript, Typescript, Java, Python, C, C++, HTML, CSS

Frameworks and Libraries: React, Node, Spring Boot, Flask, Pytorch, Scikit-learn, Tailwind

Databases: MSSQL, PostgreSQL, MYSQL, MongoDB

Developer Tools: Git, Docker, Kubernetes, AWS, Azure, Render
